YOUR CREDIT SCORE:

509

What your score means:

When Score = 0	Consumers are given a default score of 0 when their credit profile does not contain any credit data, are deceased, under debt restructure or have notices.
When Score 1 – 6	Consumers who do not have any payment profile information but have enquiry and / or negative information on their credit profile are assigned a score between 1 – 6. This score represents a risk rating with 1 being high risk and 6 being low risk.
When Score >= 300	Consumers are assigned a credit score between 300 and 850. This score is calculated using a formula that evaluates the credit information available within your credit profile. This includes, but is not limited to; the number of credit enquiries, credit account activity, payment history, length of credit history, total debt and positive and negative credit information. Good quality credit data and positive management of credit accounts will result in a higher credit score, while poor behaviour and negative information will deteriorate your credit score.

Credit Summary

This section provides a summary of your credit profile. The Adverse Data section displays the value of the highest judgement and / or collection listed on your credit profile. The Micro Lending Accounts section reflects a summary of credit information registered with the NLR (National Loans Register) while the SACRRA Accounts section reflects credit information such as revolving credit and loans from banks, retail credit, vehicle finance, mortgage loans etc.
